

As a new veterinarian, you've followed your calling to support the health and wellbeing of animals. While the rewards of your chosen profession are plenty, the transition into practice life can be challenging.

## That's why there's MentorVet Leap

Designed to help early-career veterinarians thrive, MentorVet is an evidence-based program that delivers the peer support, coaching, and mentorship you need to ease into your chosen profession.

### The MentorVet Leap Curriculum

**Requires an average time commitment of just 3 to 4 hours per month.**

Earn 10 RACE-approved CE credits by completing five online learning modules focused on these professional life skills:

[Self-care](#) | [Leadership](#) | [Conflict management](#) | [Ethical decision-making](#) | [Incremental care](#)

Once a month, upon completion of each module, you'll meet virtually with your program peers to discuss module content, compare in-practice experiences, and deepen your understanding of how to apply lessons learned.

### The MentorVet Leap Resources

**Create a customized money plan:** Gain confidence in your financial literacy and create goals to set yourself on a path towards long-term financial success. Our financial coaches are here to help.

**Put your mental health first:** It's a fact. The veterinary profession is filled with many stressors. Being proactive about your mental health is vital. Reach out to a MentorVet mental health coach for resources if you need support.

### The MentorVet Community

**Partner with a mentor:** Your learning doesn't have to begin and end in our virtual classroom. For ongoing individual support, ask MentorVet to match you with one of our highly qualified and trained mentors.

**Get social:** Leaving veterinary school behind and becoming the newest member of a practice can feel isolating. MentorVet Leap will allow you to connect with other new and recent veterinary graduates.

“These learning modules address situations that arise day to day with clients, colleagues, and even with yourself.”

A select number of full scholarships are available to early-career KVMA Members (Class of 2018-2023) for the next cohort starting in June 2023 thanks to the generous support of Merck Animal Health and the KVMA!
